

4th November 2008 – Sydney, Australia

Decillion Group's second SWIFT service bureau site goes live "Down-Under"

Decillion Group is proud to announce the launch of its second SWIFT Service Bureau which is based in Sydney, Australia.

The new GlobalReach Service Bureau is designed to complement and expand on the success already achieved by the Singapore based SWIFT Service Bureau which was launched in 2004 and boasts 65 satisfied clients.

Offering a tailored and flexible solution, GlobalReach can be customised to suit an organisation's unique set of requirements through two different service levels, GlobalReach Gateway and GlobalReach Access. The service known as GlobalReach Gateway is a partially managed solution offering connectivity to SWIFTNet allowing the user to retain the messaging application of their choice but to take advantage of using a shared connectivity infrastructure. GlobalReach Access is the complete managed service where Decillion hosts and manages the entire SWIFT infrastructure including connectivity and messaging application.

The GlobalReach Bureau will be of interest to organisations that require SWIFT message processing, but are looking to avoid the costly setup, annual licensing renewal, operational burden and on-going infrastructure upgrades, support and maintenance that is typical of full SWIFT membership. This service allows users to focus on managing and growing their core business secure in the knowledge that their SWIFT connectivity, infrastructure and maintenance are managed by Decillion Group.

GlobalReach has been designed to deliver all SWIFT messaging services and connectivity with the highest level of resiliency, hosted in a state of the art data centre with fully redundant infrastructure, secure access and all single points of failure eliminated. Uninterruptible power supplies, backup diesel generators, multiple communication carriers, gaseous fires suppression and strict access controls ensure high availability and security. For total peace of mind, the Australian and Singapore service bureaus act as Disaster Recovery Sites for each other, adding another critical dimension of resiliency. All support, upgrades, patches and maintenance are carried out by our experienced and highly knowledgeable SWIFT certified engineers.

Decillion Group has built a solid reputation as a trusted SWIFT regional business and Service Partner, and offers GlobalReach as an extension to the existing tailored and comprehensive SWIFT solutions available.
